CAREER SUMMARY

Full Stack Engineer Having 4.2 years of experience, specialized in front-end and backend development for complex scalable web apps for Digital, BFSI domain clients. Extensive experience in creating optimized and innovative digital experience across various modes, e.g. native, hybrid and web application for mobile and tablet. Have experience of many POC's along with Live projects using Agile/ waterfall methodologies. Passionate and can code the thoughts. Certified CEAN/MEAN full stack developer by NIIT Stackroute.

WORK EXPERIENCE

Senior Project Engineer

Wipro Digital

Credit Suisse
August , 2017 - Present

The client is a multinational investment bank, which has a giant IT system to support its BAU work. I got a chance to work on multiple portfolios such as Data quality management
(DQM), Business Rule framework (BRF) and Others across the Teams which was part of the Data Management group.

As a Full stack developer my role :

- Develop User Interface functionality for web applications, mobile apps using advanced UI technologies
- Create interactive, reusable JavaScript components using advance UI Framework like Angular
- Create Mobile first responsive web Applications using utilities such as Bootstrap , Flex layout which are cross browser compliant
- Building RESTful API using Express.js following MicroService architecture
- Data modeling for NoSQL Database and creating Schema for it
- Writing efficient query and use it in Backend Services
- Designing and developing prototypes for applications
- Setup and responsibility of Devops(CI/CD) activity of the Applications using tools such as : Docker, Teamcity , Maven , Shell
- Making code Review tool such as Codacy, Sonar compliant
- Mentoring and Reviewing code of Junior Members

Technologies used:

Angular/React   Bootstrap / Angular material   Redux/RXJS   HTML5/SASS/CSS
Node.js / Express.js   MongoDB / Cassandra   Webpack / Gulp.js   Teamcity / Codacy / Sonar
Java / Spring-boot   Oracle 11c - SQL

EDUCATION

M.Tech (Software Eng.)
BITS ,PILANI (WILP)
2015 - 2019

BCA
IPEM , GZB
2012 - 2015

SKILLS & TOOLS

Frontend

Angular / React

Angular Material / Bootstrap

JavaScript / TypeScript

Node.js

HTML/CSS/SASS/LESS

Backend

Node.js/ Express

MongoDB

Cassandra

Apache Kafka

CI/CD - Docker

Java - Spring -boot

Others

DevOps   Redux/RXJS
Code Review   Socket.io

Project Engineer

StackRoute / Ekstep Foundation
March , 2017 - July , 2017

<div align="right">Wipro Digital</div>

This project is developed for Ekstep foundation as part of Wipro digital transformation program. The idea of this application was to create a social networking site for various Practitioners. The application has various modules such as, stories, community , Tool-market place, invite new members , integration with external tools such as Google calendar, Discourse ,Github etc.

Role and responsibilities :

- Implemented Oauth Login for the system.
- Wrote Server-Side framework from scratch.
- Implemented Token based authentication (JWT) mechanism.
- Creating and customizing, reusable Angular directives, services, and modules for the application.
- Worked on Tool integration with Webapp (Google Calendar, Github) via Web hooks.
- Kafka publish -subscribe api to stream real time data.
- Done Cassandra db modelling and query to handle data.
- Implemented Socket.Io to handle real time notification.

Technologies used:

Angular/ React   Angular Material   Node.js / Express.js   Apache Kafka   HTML/SASS/CSS
Apache Cassandra   Oauth 2.0   Socket.io   Docker   Circle CI / Codacy   NGINX

Project Engineer

Deutsche Bank
Sep , 2015 - March ,2017

<div align="right">Wipro Ltd.</div>

IDMS is a core banking application where Core banking activities such as Account creation, NEFT transactions, SWIFT transactions, GIRO payments etc. occurs. As project engineer we have to automate these functionalities for Quality assurance.

Role and responsibilities :
